# EVERGREENS

*Above*—JUNIPERUS STRICTA

One of the trees that will always retain its popularity among the home owners is the Evergreen. Its rich beauty and graceful charm is equally enjoyable at all seasons of the year. We pride ourselves on having one of the finest collections of these trees ranging in size from the demure little Evergreens for the Rock Garden to the tall, stately Pines, Spruces and Hemlocks. Our experience in growing these trees right here in Westchester County enables us to be in a

*Right*—PINUS MUGHUS

position to serve you better in whatever your needs in Evergreens may be.

Evergreens like all plants have likes and dislikes as to soil, water and shade conditions. This subject is covered in our illustrated catalogue.

# ROSES

The Queen of all flowers deserves a place in your garden, for its fragrance and beauty will reward you for your effort. This year we will have our usual fine selection of HYBRID TEA ROSES which may be planted any time from early April until late in May and these Roses are sure to bloom throughout the entire Summer. For those who wish to plant Roses which are slightly more reasonable in price, we offer our fine assortment of dormant Roses, which should be planted early in April. We are again offering some of our fine TREE ROSES as well as the DWARF ROCK GARDEN ROSES and you are urged to place your order early as the demand for Roses is going to be greater than ever this year.

# SHADE TREES

Our stock of ORNAMENTAL AND SHADE TREES is especially fine. We have many of the choicer varieties, such as BLOODLEAF JAPANESE MAPLE, PINK and WHITEFLOWERING DOGWOODS, MAGNOLIAS, FLOWERING CRAB APPLES, WEEPING JAPANESE CHERRIES, PURPLELEAF PLUMS.

For shade tree purposes we recommend planting NORWAY or SUGAR MAPLES, ORIENTAL PLANES, RED OAKS, WEEPING WILLOWS, EUROPEAN MOUNTAIN-ASH, LINDENS and ELMS. Plan to plant your trees as soon as the frost leaves the ground as they will thrive best when transplanted before the leaves appear. Stop in at the Nursery and let us help you select the proper trees for your particular location. Plant a tree and watch it grow. You will derive a great

deal of pleasure watching it become more and more majestic as the years go by.

Little thought is given to the part shade trees play in landscapes. Picture in your mind the finest planting you have ever seen. Now take out all the ornamental and shade trees. You will find only an unattractive planting for they are an integral part of that landscape.

*Bushy, well-formed Maples are an asset to any landscape*

# PERENNIAL AND ROCK GARDEN PLANTS

We specialize in the growing of PERENNIALS and ROCK GARDEN PLANTS and among the many that we produce are the well-known old favorites and also rare and new varieties, which are of so much interest to our botanical friends. We grow the different varieties of plants that will thrive in sunny or shady locations and also for dry or moist ground. There are some varieties that are especially useful for wall gardening and others for planting between stepping stones. The plants can be selected so that the blooming period can be extended throughout the entire season. A most important step in planning perennial gardens is to arrange color combinations that harmonize.

PHLOX

DELPHINIUM

## VINES and CLIMBERS

To complete the landscape planting, it is very often advisable to start a few vines or ground cover plants such as BOSTON or ENGLISH IVY, CLEMATIS, PACHYSANDRA or WISTERIA.

In a very short space of time these beautiful plants are matured.

Next Planting*

GERMAN IRIS

The best results can be very easily obtained by simply coming to our Nursery and selecting your choice of plants from our many varieties which are neatly arranged in beds in the field. Your plants will be dug with a generous ball of earth while you wait and you will be given every possible assistance in the selection of the proper plants for your particular purpose. It is really surprising how inexpensive these PERENNIALS and ROCK GARDEN PLANTS are, and, you can be assured of the best results because of our long experience and efficient method of merchandising them to the complete satisfaction of our customers.

CHRYSANTHEMUM

## FRUITS

There is a great deal of satisfaction to be had in eating delicious fruit grown right from your own trees. Why not plant a few? We have the better varieties of APPLES, CHERRIES, PEACHES, PEARS, PLUMS and GRAPES, some of which are of fruiting age.

SHRUBS FOR BACKGROUND AND SCREEN

## DECIDUOUS SHRUBS

DECIDUOUS SHRUBS always serve a very useful part in any garden, either as a background for flowers or perennials or to screen off some undesirable object. They should be selected with their periods of blooming in mind so that you derive continuous bloom during the entire growing season. We are now growing some of the newer and choicer varieties which you really should know. If some of your older shrubs have outgrown their usefulness, why not let us help you select some Shrubs to replace them. It is most important that you consult us before planning your planting to achieve the best effect possible. There is no plant found in any nursery that will produce as big an effect for as little expense as this type.

RHODODENDRON

## EVERGREEN SHRUBS

During the last few years, there has been an ever increasing demand for EVERGREEN SHRUBS. The beauty of their foliage, which retains its color during the bleak Winter months, together with their gorgeous flowers make this one of the most useful type of plant. This year we have a very fine selection to offer which includes ABELIAS, AZALEAS in variety, EVERGREEN BARBERRIES, BOXWOOD, DAPHNE, HEATHER, HOLLY, MOUNTAIN-LAUREL, MAHONIA, MOUNTAIN ANDROMEDA and RHODODENDRONS, both native and also some of the finest Hybrid varieties. One of the best characteristics of this plant is that it thrives in the shade. Give us an opportunity to help you select the proper plant for your particular requirements.

# ROCK GARDENS

It is surprising how attractive even a limited space can be made with a few rocks and the little gems offered in our catalog. Dwarf shrubs such as AZALEAS, COTONEASTERS, DAPHNE, HEATHER and slow growing evergreens may be combined with the planting of rock garden plants and very often

it happens that a few of these plants are exactly what is needed to make your planting complete and attractive. Our stock of these plants is very complete and when you stop in at the nursery, it will be a pleasure to show them to you.

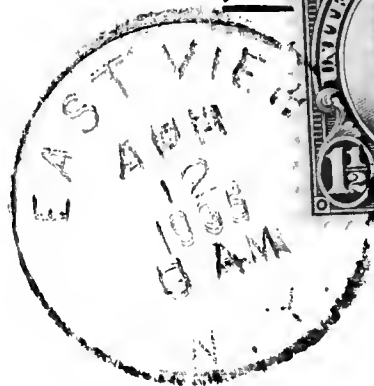

## *Write for Catalogue*

An attractive illustrated catalogue has been prepared by us for your convenience. This booklet is full of useful planning and planting information and included are many illustrations in natural color. You can have one of these for the asking.
